Parcel Tax ID# _____	Section _____ Township _____ Range _____

Site Address and directions to site: _____		

Drilling Company _____	Driller Name _____	License # _____
Anticipated Start Date _____	Start Card No. (if received) _____	

SITE PLOT PLAN

<p><u>The plot plan must show the items listed below. Please draw the site in the allocated section on the reverse side of this document or attach another document to this application if needed.</u></p> <ul style="list-style-type: none"> Indicate North with an arrow and draw the property boundaries; Show all natural features, such as areas of permanent or seasonal surface water, streams, rivers, bluffs, etc.; Show existing roads and other constructed or developed features (to help in locating the site); Show all potential sources of contamination. These include, but are not limited to: approved septic areas (SPAAD), installed septic systems, septic reserve areas, barns, stock yards, sewage lagoons, hazardous waste sites, marine shorelines, or any other potential source listed in WAC 173-160-171(including those located on adjacent lots); Show all existing wells, including all wells that are to be decommissioned; Indicated the well radius of 100', including all potential sources of contamination on the lot and the affected portions of adjacent lot(s); Show measurements from the proposed well or decommissioned well to at least two (2) property lines and to all sources of contamination and septic approvals, including those located on adjacent lots;

<p><u>Please understand the following items when siting your well:</u></p> <ul style="list-style-type: none"> Consider locating the well 100 feet or more from any property line to ensure full control of the wells protective zone. This may be a requirement if the parcel is in a subdivision with plat conditions that requires the well to be located 100' from all property lines. The well must be located 100 feet minimum from any sources of contamination, including: approved septic areas (SPAAD), installed septic systems and septic reserve areas, barns, stock yards, sewage lagoons, hazardous waste sites, marine shorelines, or any other potential source listed in WAC 173-160-171. The well must be located 1,000 feet minimum from the property line of an operating or closed landfill or solid waste facility. If this well is located in a stream, any area of seasonal inundation or permanent surface water, then further well construction requirements will be needed. If this well is located in the inventory area (WRIA 17, WAC 173-517), then further well use requirements will be applied.

NOTE: If parcel can be served by an approved public water supply, the water purveyor will have the first right of refusal to use the well. Please be aware that this may delay your application as the purveyor evaluates their conditions of approval on a case-by-case basis.

PLOT PLAN

By signing this application form, the ***applicant/owner*** attests that the information provided herein is true and correct to the best of your knowledge. Any material falsehood or any omission of a material fact made by the applicant/owner with respect to this application may result in the denial of a building permit utilizing the subject well, or may require abandonment of the subject well. I agree to provide access and right of entry to Jefferson County employees, representatives or agents for the purpose of application review and any required inspections. Access and right of entry to the applicant's property or structure shall occur during regular business hours. I further agree to save, indemnify and hold harmless Jefferson County against all liabilities, judgments, court costs, attorney fees and expenses which may in any way accrue against Jefferson County as a result of or in consequence of this application, drilling of the proposed well, or any subsequent inspections.
