PERMIT TRANSMITTAL

DATE: 10-01-2020

BUILDING PERMIT: NOT YET ASSIGNED

OWNER: JEFFERSON COUNTY
JEFFERSON COUNTY SPORTSMEN'S CLUB

SITE ADDRESS: 112 GUN CLUB ROAD
PORT TOWNSEND, WA 98368

PARCEL #: 001083012

The proposed structure for Jeff.Co. Sportsmen's Club, located on Jefferson County property, is a concrete shell of insulated concrete bays designed to reduce sound transmission at the existing seated rifle range. Permit drawings have focused on the proposed structure at hand and do not have an encompassing understanding of all structures and functions on the large County owned parcel. The atypical nature of the project is outlined as follows:

- There is no additional plumbing, electrical, or mechanical systems associated with the proposed structure
- The proposed structure will not be occupied and is unconditioned
- Prescriptive Energy Code Compliance and associated application paperwork were deemed not applicable to the proposed structure
- Due to the various parties that occupy the County parcel, not all existing structures were able to be verified, measured, or located. Existing structures near the proposed structure have been identified on the site plan with general sizes generated from Jefferson County GIS information. An accurate existing impervious area square footage was unable to be obtained by the design team
- Select questions on the permit application were not able not able to be completed due to the unconventional nature of the project

Please contact us if there are any questions.
