

## SOIL LOGS LEGEND

### Mottling

F or Fnt = Faint

D or Dist = Distinct

P or Prom = Prominent

### Structure

L = Loose

SG = Single Grain

SC or Slt Comp = Slightly Compact

MC or Mod Comp = Moderately Compact

VC or Vry Comp = Very Compact

CEM = Cemented

MAS = Massive

BLKY = Blocky

STRT = Stratified

### Texture (see below for modifiers such as F = Fine or G = Gravelly)

S or snd = Sand

LS or lmy snd = Loamy Sand

SL or sndy lm = Sandy Loam

L = Loam

SiL or sil lm = Silt Loam

Si or sil = Silt

SiCL or silclylm = Silty Clay Loam

SiC or silcly = Silty Clay

CL or clylm = Clay Loam

SCL or sndclylm = Sandy Clay Loam

SC or sndcly = Sandy Clay

C or cly = Clay

### Textural Modifiers

F or fn = Fine

M or md = Medium

Crs = Coarse

G or grvly = Gravelly ( $\geq 15\%$ , but  $< 35\%$  rock/gravel fragments)

VG or vrygrvly = Very Gravelly ( $\geq 35\%$  but  $< 60\%$  rock/gravel fragments)

EG or Exgrvly = Extremely Gravelly ( $\geq 60\%$  but  $< 90\%$  rock/gravel fragments)

Cob = Cobbles ( $\geq 3$  inches)

### Application Rate

R = Restrictive

For others see Table VIII, WAC 246-272A
