

Community Situation Report

2020 COVID-19 Pandemic

March 31, 2020

Tips for Families

Living in a community where many people are wearing masks, your child may want to “pretend play” wearing a mask. This is very typical for toddlers! Pretend play is one way that children make sense of their world, by “trying on” the roles and people they see in the world around them. As a parent, you can decide how comfortable you are with this play theme. You might also suggest pretend play around medical roles (doctor/nurse with a teddy bear) to focus on how people take care of others when they are sick.

During stressful times, what children need most is you—a safe, secure relationship where they can express their feelings and questions. Here are some tips:

- Keep daily routines (naptime, bedtime) as consistent as possible for your child.
- Limit your child’s exposure to media reports about COVID-19. Remember, your child is soaking in the tension you’re feeling as you watch the news.
- Discuss your own questions/worries about COVID-19 when your child is out of earshot.
- Practice good hygiene to limit exposure to COVID-19.
