

## EMERGENCY ROAD REPAIRS WINTER 2015-2016

The winter of 2015-2016 was one of the wettest winters on record in Western Washington and it took its toll on Jefferson County roads. County staff and contractors worked all winter and into the early summer to keep county roads passable and repair damage. These photos show some, but not all of the sites, damaged during this season. The County has recovered some of its costs for this damage from the Federal Emergency Management Agency (FEMA) and the Federal Highway Administration (FHWA) and is continuing to work with FEMA for additional assistance.
